

SECURE SERVICES

OVERVIEW:

SECURE is MMEC's dedicated service built to ensure your organization achieves mandated security compliance and operational resilience within the microelectronics ecosystem. We are your dedicated resource for advancing security awareness, compliance readiness, and uncompromising Government Contracting Approach.

SECURE delivers recurring live virtual and in-person training designed to equip your personnel with the precise tools and knowledge needed to meet stringent government mandates and posture your organization for successful audits and the pursuit of the highest ratings in critical areas:

- Facility Security Officer (FSO) Operations
- Insider Threat Program (ITP) Operations
- Cybersecurity Compliance (CMMC)
- Export Control (ITAR/EAR)
- DCSA Audit Preparedness

This expert-led program provides templates, hands-on guidance, and dedicated sessions covering essential compliance topics such as: CMMC Level 2 audit readiness, Insider Threat Program development, ITAR/EAR compliance, DCSA review preparation, and efficient Personnel and Facility Clearance (FCL) management.

By strategically incorporating interns and emerging professionals into training facilitation, SECURE not only strengthens your current operational security but also actively contributes to the next generation of cleared professionals. This focus promotes confidence, situational awareness, and crucial workforce readiness across the entire National Industrial Security Base

“ BUILDING A CULTURE OF SECURITY AND COMPLIANCE

FEATURES & BENEFITS:

- Bi-Monthly Security Compliance Webinars
- FSO Government contract compliance & security program development
- CMMC audit readiness
- Export assessment regarding ITAR/EAR compliance.
- Insider threat program development
- Quarterly reports, security news letters and portal access
- Participation opportunities for students & interns
- Strategic and operational leadership across mission-critical classified government programs
- Full-spectrum development, implementation, & executive management

SECURE COMPLIANCE CYCLE:

- **ASSESS:** Gap analysis / facility review
- **TRAIN:** Recurring mandatory compliance training
- **IMPROVE:** Update process continuously
- **SECURE:** Apply controls + documentation

SECURE SERVICES

OUR VALUE:

We help organizations navigate the cost and complexity of personnel and facility clearances, sensitive information handling, and compliance requirements. With 80+ years of combined experience across government, military, and industry, our team delivers practical, cost-effective security and threat-mitigation solutions. We design, implement, and sustain compliance programs aligned with NISPOM, CMMC/CUI, and federal regulations—strengthening your overall security posture, from FSO oversight to insider threat and FOCl mitigation.

COST BENEFIT:

The true cost of maintaining an in-house, fully cleared security officer (FSO) extends far beyond salary, encompassing recruitment, benefits, specialized training, and administrative overhead. Our Fractional Employee SECURE Support replaces this heavy, fixed overhead with a flexible, scalable service model. By leveraging our certified FSO, ITPSO, and Special Programs experts only when required, you drastically reduce personnel costs while gaining immediate, audit-ready compliance management. As the graph illustrates, our approach provides a superior return on security investment, protecting you against the financial risk of non-compliance and ensuring project execution efficiency.

COST & READINESS:

In-House FSO (Cost):	100% (Salary + Benefits)
SECURE Platform (Cost):	40% (Subscription)
In-House (Time to Audit Readiness):	6-9 Months
SECURE Platform (Time to Audit Readiness):	45 Days

CORE COMPETENCIES:

AFSO and ITPSO (Support Role)

- Plan (SPP) implementation for CUI per 32 CFR §117
- Assist with insider threat program implementation; support §117.17
- Support NBIS/NISS/DISS for visit requests, incident reporting, PCL/FCL status changes
- Assist with basic self-inspections and FOCl support

Special Access Programs AFSO for (Support Role)

- Support SAP specific SPP implementation per DoD 5205.07
- Assist with tailored §117.12 briefings/trainings to include SCI and COMSEC
- Administer NBIS/NISS/DISS for visits/incidents
- Support basic self-inspections and FOCl mitigation

FSO and ITPSO (Development and Management Role)

- Develop/maintain SPP (32 CFR §117 aligned); manage FCLs/PCLs via NBIS/NISS/DISS
- Conduct self-inspections on Security Program
- Develop/deliver comprehensive §117.12 briefings/trainings; manage classified visit protocols
- Manage incident reporting/response, FOCl mitigation

Special Access Programs FSO and ITPSO (Development and Management Role)

- Develop/manage SAP SPPs, FCLs/PCLs; conduct advanced self-inspections
- Develop/deliver specialized §117.12 briefings/trainings
- Manage NBIS/NISS/DISS for status changes/incidents
- Administer FOCl mitigation and quarterly audits

CMMC/NIST 800-171 Compliance

- Develop/Deliver CMMC Trainings; including Security Awareness, CUI, Incident Response, and Insider Threat
- Readiness evaluations with control gap listings, including vendor and technology evaluation
- Development of CMMC programs, processes, and controls
- Assist with documentation development; including SSPs, POA&Ms, Policies & Procedures, Boundary Diagram
